EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Drawings

The drawings are objected to because proper cross-hatching at cross sections indicated at 8 must be illustrated. The drawings filed on 8/21/2006 are acceptable subject to correction of the following informalities: proper cross hatching at cross sections indicated at 8 must be illustrated. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

Amendment

Authorization for this examiner's amendment was given in telephone interviews with Mr. Liam McDowell on 11/9/2006.

The application has amended as follows:

Claim 19 lines 21-23 has been amended to replace:

"two pairs of half rings, one posterior pair of half rings and one anterior pair of half rings linked by four connecting lugs,"

with:

--two pairs of half rings, comprising, one posterior pair of half rings and one anterior pair of half rings, said two pairs of half rings linked by four connecting lugs,--

The following is an examiner's statement of reasons for allowance:

The prior art, particularly Hoback shows various types of tube assembling devices. The prior art does not teach or suggest the combination of features claimed. For example, the prior art does not suggest plural flexible hubs, and plural hub carriers each comprising two pairs of half rings, comprising, one posterior pair of half rings and one anterior pair of half rings, said two pairs of half rings linked by four connecting lugs, said connecting lugs are offset by 90 degrees about an anterior-posterior axis; at least one pair of tongues extending from one of the pairs of half rings and pointing in a direction of the other of the pair of half rings, so that when a tube is inserted into the hub-carrier either said pair of tongues remain outside the tube and positioning of said hub-carrier is made all along the tube, which is slightly compressed between the pair of tongues, or one tongue of said pair of tongues is inserted inside the tube and positioning of the hub-carrier occurs at an end of the tube.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel J. Mills whose telephone number is 571-272-8115. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel P. Stodola can be reached on 571-272-7087. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
